

T24 PRODUCT IMPLEMENTATION SERVICES

Core banking platform is the corner stone of a bank's business. T24 platform from Temenos is the leading core banking platform globally and has been implemented by majority of top 50 banking organizations.

Maveric has extensive experience in being a part of large scale T24 transformations world wide. Our end to end transformation assurance services are designed to help you derive maximum benefits from your core transformation program. We offer end to end services across the T24 landscape, right from implementation and upgrades to maintenance and support initiatives.

Our Services

T 24 roll out

Greenfield implementation: for a new bank or for a new subsidiary of an existing bank.

Development and maintenance: Handling enhancements, updates and fixes on an on-going basis.

Migration: Enable migration across a wide range of operating systems including

- AIX to .Net, Linux or Unix platforms or vice versa,
- Legacy applications or other platforms to T 24,
- Jbase to other RDBMS such as Oracle, DB2 or SQL or vice versa.

Upgrades: Assist in migration of multiple operating systems and platforms including

- AIX. .Net, Linux or Unix,
- T 24 from one release to another covering conversion and roll over,
- Databases be it Jbase, Oracle, Db2 or SQL.

T 24 support services

Management: Program or project management of greenfield implementation, development and maintenance, migration or upgrades.

Performance Management: Performance measurement, tuning and maintenance of servers, applications and databases.

IT operations or DevOps: COB management and tuning, parameter maintenance, interface management, system and operations log based reporting and Business Continuity Planning (BCP) management.

Support: L1 and L2 IT support, L1 and L2 operations support.

Advisory: On T24 components such as TAFC, TAFJ, TWS, TOFF (EE), OFS or TC server, on special modules such as Analytics, Risk and Compliance and Financial Crime.

Engagement Models:

Our services can be executed through various engagement models right from staffing and project mode to a managed services and Output Based Model (OBM), based on your preference and scope of engagement. Our engagements are further strengthened by our diverse talent, extending across a wide range of roles including project managers, developers, business analysts, product specialists, product managers, testers and conversion specialists.
