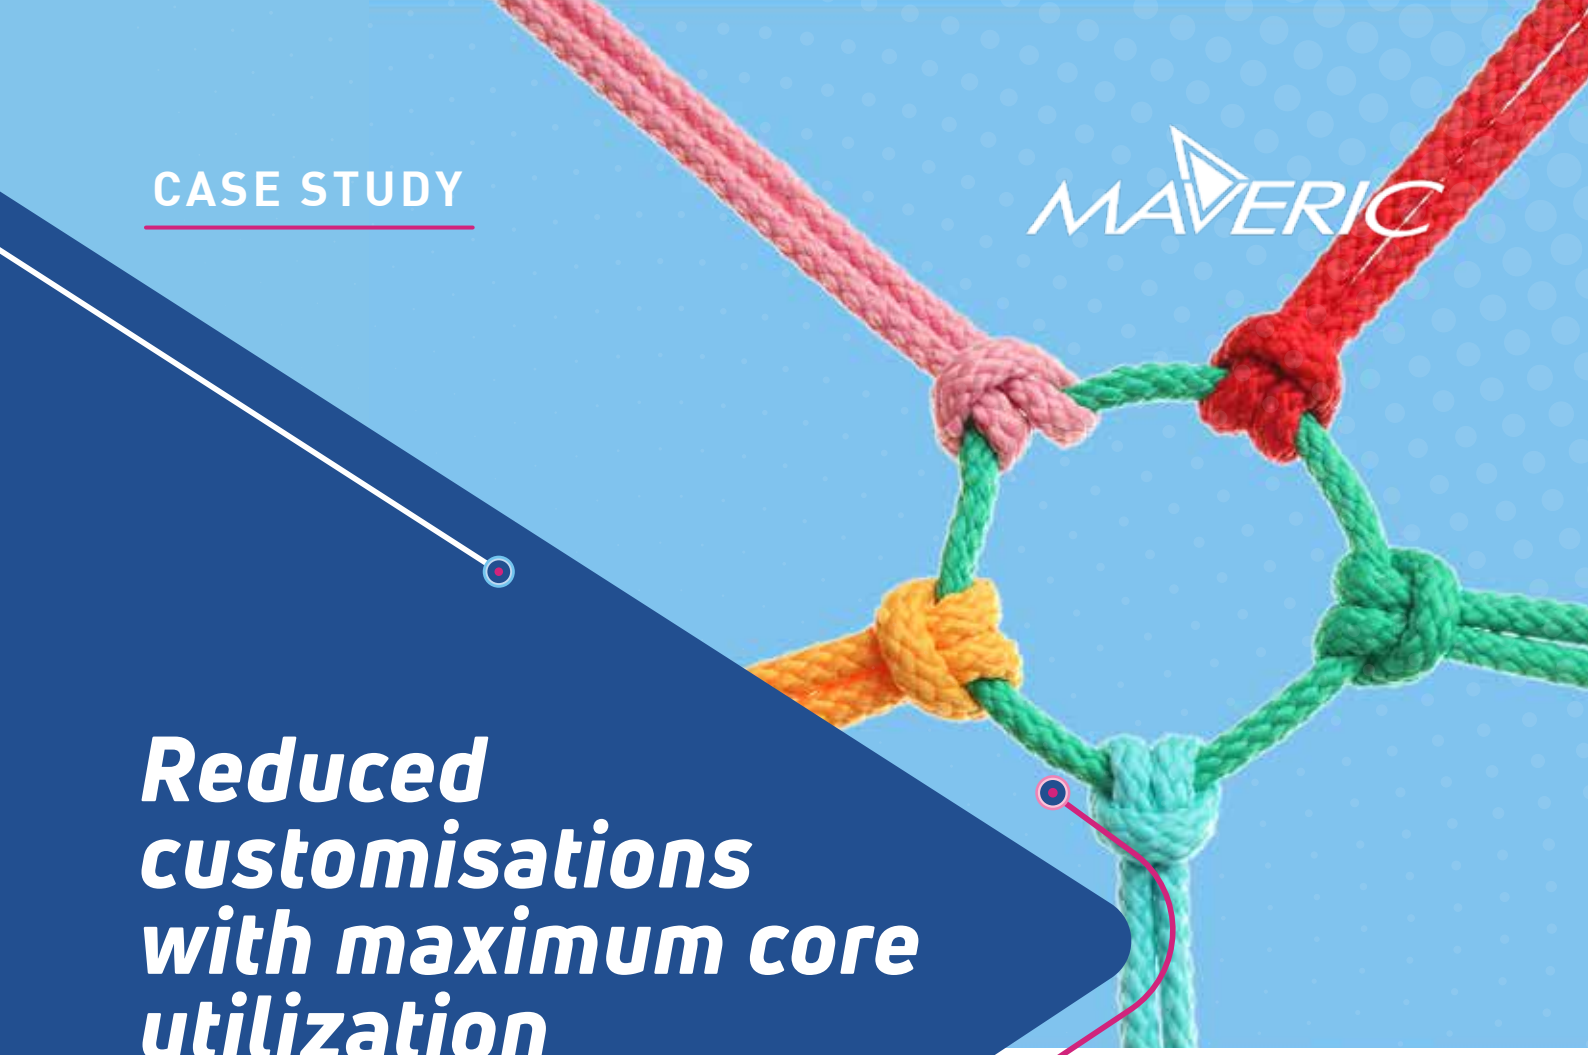
CASE STUDY



Reduced customisations with maximum core utilization

A Leading Islamic bank in KSA

ENGAGEMENT HIGHLIGHTS

- Less than 10% customisations with maximum core utilisation
- Less than 1% defects in testing
- 360 degree visibility of existing features and workflows

CHALLENGE

- Client was going through a core migration to Temenos suite in a staggered manner
- Decided to build new features along with the migration
- Had unique products with customizable process
- Sufficient knowledge of Temenos suite was not there in the team.

SOLUTION

- Legacy features were compared with our proprietary CMAX library to see fitment to Temenos suite
- New features were similarly mapped to Temenos suite to minimize customization
- Workflows were mapped to Temenos suite to accommodate customizable process

RESULTS

- Less than 10% customization
- Less than 1% defects in testing
- Full traceability to existing features and workflows
- Future proofing for upgrade

Our promise of **Connected Core** helps you to accelerate your next banking transformation by building a connected core designed with reliable solutions and endowed through encyclopedic Temenos proficiency
